

The ELM Group recognizes that stream degradation is a symptom of changing land use and poor land use management decisions in a watershed. ELM emphasizes the importance of understanding the source of the problem in order to implement lasting restoration solutions.

stream & watershed restoration

- ▶ Watershed Studies / Management
 - Water Budget Analysis
 - Water Quality Evaluations
 - Aquatic Impact Assessments
 - Surface / Ground Water Assessments
- ▶ Property Development / Redevelopment
- ▶ GIS Modeling & Mapping
- ▶ Comprehensive Plans
- ▶ Restoration Design
 - Natural Stream Channel Design
 - Watershed Management Strategies
 - Best Management Practices
- ▶ Permitting
 - Soil Erosion & Sediment Control
 - National Pollutant Discharge Elimination System
 - Wetlands: General or Joint
 - Anti-Degradation

additional support

- ▶ Public Education
- ▶ Construction Oversight
- ▶ Monitoring
- ▶ Invasive Species Management
- ▶ Stormwater Runoff Management
 - Rain Gardens
 - Bioretention

ELM's Proven Success

- ▶ Application of Natural Stream Channel Design Methodology (Rosgen)
- ▶ Unique Multi-Disciplinary Approach to Watershed Management and Restoration
- ▶ Development of Approved Restoration Designs Using Innovative Strategies
- ▶ Current Training and Hands-On Experience
